*"A Life's worth of Training"*

## Petroleum Safety Training (PST) (IRP 16)

### ENFORM

Petroleum Safety Training (PST) meets all of the requirements for IRP 16 - Basic Safety Awareness Training.

PST is an interactive multi-media program with video, audio and interactive lessons. This safety training program has been designed and produced for all workers in the petroleum industry. It is user friendly and has been specifically designed so learners do not need significant computer skills. Learners can relax and enjoy the training process, as they are easily guided through each lesson.

Total running time of the program is approximately six hours. Topics include regulations, WHMIS, personal protective equipment (PPE), hazard recognition and control, common workplace hazards and control, oil and gas industry hazards and control, gas hazards and control measures, exploration hazards and control (optional), rig hazards and control (optional), oilfield trucking hazards and control (optional), production and plant hazards and control (optional), work procedures and safety communication
