JT Safety Training
Dawson Creek, BC

Attn: June

Re: Recent H2S Course - Letter of Reference

Hi June

Earlier this month I had the opportunity to take a course with JT Safety Training on behalf of a client of mine (Action Health and Safety). I took the H2S course with instructor Clifford Fix. With my work at Action Health and Safety, there will be a requirement that I attend worksites and so getting trained and up to speed was important to maintain my contracts.

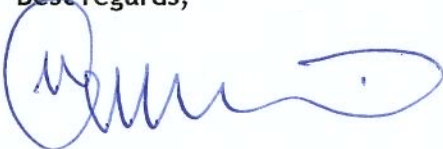

I wanted to say that this course was one of the best I have taken. Cliff was awesome and provided great training. He was funny but serious as well. He presented the content professionally and I learned a great deal. Some people suggested it might be boring but it certainly was not! I personally learned a great deal and feel very comfortable attending well sites now know what to watch for. I was pleased to see that Cliff treated everyone equally and never made anyone feel uncomfortable. It was obvious that he knows his stuff and has a lot of real world experience in the field.

The registration was handled well and very easy. When it came time to breaks and lunch breaks, he was right on time. And didn't waste any time either. At the beginning of the class Cliff went over all the basics, housekeeping and made everyone feel right at home.

Over the past 20 years I have taken training with the RCMP (as a past civilian member), the Dawson Creek Fire Dept, and Emergency Health Services. This training by far was one of the very best I have taken. I think it says a lot about your organization and I would highly recommend JT Safety Training and instructor Cliff Fix to any company thinking about safety training. Please pass on my congratulations to Cliff on a job well down!

In closing, I look forward to taking more courses in first aid in the coming months. Keep up the great work and feel free to pass on my name and phone number to anyone interested in a reference!

Best regards,
